### A. Film Production

## 1. Security Film

25X1A9a  
25X1A6a

Production of this film was scheduled to resume on 21 January. A delay of two weeks has been encountered however due to the fact that [REDACTED], the contract cameraman, will not be available until 1 February because of another commitment in New York City. The rest of the film crew, including [REDACTED], plan to proceed to [REDACTED] on 25 January to finish pre-production planning including building of sets, etc., in order that actual shooting can commence on the sound stage on 1 February. The time between now and then will be spent breaking down the script and selecting actors to appear in the balance of the film not yet shot. This requires casting 35 roles which, in itself, is a considerable task. In addition, the crew is continuing to work on set designs, procurement of props, equipment, etc.

Additional rushes of film already exposed were viewed on 4 January and appear to be very satisfactory.

## 2. DDI Film
